

Bison triggered Avalanche in YNP?

Out of Advisory Area

12/17/2019

Code

SS-AW

Latitude

44.92680

Longitude

-110.45100

Notes

From an email:

Upper Elk Creek, E. [aspect](#), 8,200 ft

Debris looked pretty fresh, Who knows, but could have been triggered either directly or remotely by bison. The disturbance to lookers left (at bench) is due to bison - they are not cryptic animals!

Number of slides

1

Number caught

0

Number buried

0
