

# Whumphing and old avalanche at Bacon Rind

Bacon Rind  
Southern Madison  
1/10/2021  
Code  
Latitude  
44.96090  
Longitude  
-111.10000  
Notes

From email: "...I found a small piece of this mostly low angle slope to have avalanched, probably from a day or two ago, a handful of older tracks were near it. I measure most of this slope around 26-28 degrees... This is on the farthest south part of the top meadow. An epic amount of whumphs up there, I stopped counting after I got to 10 on my second switch back. Our best one knocked snow out of a tree 100' away. It feels like remote triggering is a very real possibility. Skies were more overcast than expected. While it never went blue, the sun poked out a little in the afternoon. Cold temps, 0F in the AM, warmed to 24F in the PM. 5-6mm [surface hoar](#) everywhere,..."
