

Lick Creek

Date

Mon, 01/02/2023 - 11:45

Activity

Skiing

On both aspects, the wind / sun crust buried under the last little storm is supportable but not adhering well to that storm (some little slabs had come off people's turns about 2/3 the way down the back side) and there was ~ 1/4" surface hoar formed in the sunny spots of both aspects already at about noon today.

Region

Northern Gallatin

Location (from list)

Lick Creek
