

New snow isn't sticking to anything in the Bridgers

Date

Sat, 03/25/2023 - 11:00

Activity

Snowboarding

As of this morning this fresh snow is forming a layer that just slips right off the sun-baked ice underneath. Respectfully recommend level 4 "high" avy danger for the Bridgers. Bridger Bowl didn't accurately report the snow received. There's significantly more than 7". It was crotch-to-waist deep on much of the mountain.

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

Alex D.
