

Cooke City, More Avalanche Activity

Date

Thu, 01/25/2024 - 18:00

Activity

Skiing

From email: "Photo of a recent [slide](#) observed today, north of Cooke. East [aspect](#), 9k'.

We also remotely triggered a different, small avalanche today from safe terrain while eating our lunch!

And had an ECTP3 and ECTV on the Jan. 5th interface (30cms down), also on easterly aspects.

Widespread collapsing today too."

Region

Cooke City

Observer Name

Beau Fredlund
