

Remotely triggered, wet slab avalanche in the Taylor Fork

Taylor Fork
Southern Madison
4/14/2024
Code
WS-AMr-R2-D2-O
Elevation
8600
Aspect
E
Latitude
45.06070
Longitude
-111.27200
Notes

From IG: A group of riders noted very wet snow west of Cabin Creek and Southwest of the Taylor Fork. They were sinking to the ground where it was unconsolidated. The group remotely triggered a wet [slab](#) avalanche from the ridge top. There were shooting cracks that connected their location to the avalanche. This is an interesting of [persistent weak layer](#) and [wet snow avalanche](#) problems.

Number of slides
1
Number caught
0
Number buried
0
