

Scotch Bonnet and Sheep Mtn obs

Date

Thu, 12/05/2024 - 13:15

Activity

Skiing

We skied around Scotch Bonnet and Sheep Mtn., north of Cooke City today.

No collapsing nor cracking, nor any avalanche activity observed.

Snow profile attached from a SE aspect at 10,000' on Scotch Bonnet. HS65, ECTP22 @25.

Surface hoar (4-8mm), observed on most slopes, except on steep solar slopes and especially windy locations.

Region

Cooke City

Observer Name

B. Fredlund
