

Large Whumph at Blackmore

Mt Blackmore
Northern Gallatin
12/15/2024
Code
Latitude
45.44440
Longitude
-111.00400
Notes

I observed a large whoomph about 150ft from the ridge (top of glades) going up Blackmore today while breaking trail. was definitely wind loaded area... I could feel the energy in the snowpack today once I got up higher, super sensitive it seems. ECTN 14 in my pit I dug lower down the meadow with no [wind slab](#) prevalent.
