

Wind slab avalanche on Two Top

Date

Sat, 01/11/2025 - 14:30

Activity

Snowmobiling

A wind slab avalanche was seen just below Two Top. This appeared to be a natural slide although tracks can be seen above and to the left of the crown. This was on a northeast facing slope that was wind loaded. The avalanche appeared to be fresh after recent snow.

Region

Out of Advisory Area

Location (from list)

Two Top

Observer Name

Carrie Barnhart
