

Rider buried near Cooke City, close call

Wolverine Peak

Cooke City

2/25/2025

Code

AMu

Latitude

45.05300

Longitude

-110.01000

Notes

We received a call (from a third party) about a snowmobiler that was buried with their head 5 feet below the snow and their foot sticking out of the snow. Their partners saw the foot and dug them out. The riders face was blue, but quickly became responsive after a "chest thump". We are unsure of the exact location, but sounds like in the Wolverine/Mt. Abundance area.
