Slide off of The Nose

Date
Sat, 05/03/2025 - 10:55
Activity
Skiing

We were above the entrance to Exit Chute and triggered a slough slide that slid down one of the gullies that emptied into PK bowl. It appears to have followed an existing slide path, terminating in the top of what looked to be a significant existing avalanche runout. The slide looks pretty wide but not deep.

Region
Bridger Range
Location (from list)
Bridger Bowl
Observer Name
Emily Hook
