Stability Test Notes:  
 Layer notes:  
 17-30: Pro

Notes: Snowpack very supportable. No avalanches, no collapsing, no cracking. I was a little surprised, but I do not trust this depth hoar, and we were cautious travelling to this pit. I expect avalanches when we finally get a good storm. This area has received 0.6" SWE over 4 days and before of no loading. The last quick load was 0.8 inches in 12 hrs over 2 weeks ago.
